

We also supply ribbons!

Logistics labels are often exposed to different environments from rough handling to cold, heat and moisture.

Produce Labels on food products require durability, scratch and smudge as well as resistance to outdoor elements.

Healthcare Identification labels on medicine boxes, blood bags and patient wristbands.

Flexible packaging requires high speed for printing date, price, lotnumber and barcodes directly on the packaging.

Chemical drums require identification labels that comply with GHS and BS5609 regulations.

Whatever your printer, we can supply the ribbon for the job!

We also supply ribbons!

Let our experts help you choose the correct ribbon for the job.

WAX

Offers robust and economical printing solutions for general purpose labelling applications onto coated and uncoated papers.

COLOURS

Colour printing gives quick visual recognition. Great for coding, stocking and tracking merchandise.

WAX-RESIN

For use on paper and synthetic labels where durability is expected due to rough handling, abrasion and outdoor elements.

RESIN

For use on synthetic labels that requires high performance images for harsh environment labelling, chemical/abrasion resistance and exposure to extreme temperatures.
